Description:

CD Version - Six Compact Discs
NLP: A Powerful Technology for Producing Change
When we first encountered NLP more than a dozen years ago, we realized it represented a paradigm shift-completely new way of thinking that makes heightened achievement levels and personal transformation possible. Here's the great reality about NLP: If one person can do something, anyone else can learn how to do it! Now, human excellence can be systematically studied, then reproduced. Just as you can learn to ski, drive, or use a computer, so too can you learn to apply the core achievement skills: motivation, persuasion, confidence and self-esteem. In this program, some of the nation's outstanding NLP trainers will share the same strategies they have taught thousands of NLP Comprehensive seminar participants. You'll learn:
How your motivation strategy works and how to use it at will
How to eliminate past limitations and gain confidence in your future
How to set your goals and future mission
*How to apply specific processes to gain deep self-appreciation and self-esteem

great audio. I wish some techniques were explained thoroughly, since I had to look at the books in order to perform all the techniques. Some details were not explained till the end (just small details, like if a picture is seen on the right or left, etc). I gave it only 4 stars because for somebody without NLP knowledge, it won't be complete.
